

## Industrial Visit at SIG (Palghar and Khadkoli)

The faculty members and students of [SIES School of Packaging - Packaging Technology Centre](#) and SIES College of Arts, Science and Commerce, Nerul, had the privilege of visiting SIG (Palghar and Khadkoli) manufacturing facilities on 25th June, 2026, as part of an academic–industry interaction initiative. The visit provided [B.Sc.](#) Packaging Technology and Post Graduate Diploma in Packaging Science and Technology (PGDPST) students with valuable exposure to advanced packaging technologies, manufacturing processes including Injection moulding, Blown film extrusion, multilayer laminates, and Bag-in-Box (BIB) systems, along with quality management practices, sustainability initiatives, and contemporary industry practices.

SIES SOP extends its sincere gratitude to SIG Group and its leadership and technical teams for their warm hospitality, insightful presentations, and comprehensive plant tour. The interactions with the Production, Mould Design, Marketing, and HR teams offered the students and faculty members a deeper understanding of industrial operations and emerging trends in the packaging sector.

The visit was attended by Mr. Rajesh Kumar Gera, Ms. Trupti Wani, Ms. Nisha Padmanabhan and Ms. Sanghamitra Shahal, along with students. Such industry engagements play a vital role in bridging the gap between academic learning and real-world industrial applications, preparing students to become competent packaging professionals. The entire SIG team provided an enriching learning experience and strengthened the industry–academia partnership.
